# BUGS THAT EAT OIL

Eliminator Absorbent and Degreaser are unique products that are capable of dealing with oil spills effectively and amazingly quickly.

The absorbent comes in powder form and consists of cotton waste and millions of oil eating microbes. The product is entirely natural and eco-friendly. The bugs eat up the oil at an astonishing rate so what might have been an accident that would normally take hours if not days to clear can be dealt with, quite literally, within a few minutes. The waste becomes non hazardous, completely harmless, bio degradable and eco friendly. In fact, given enough time the waste can be used as a fertilizer. The degreaser comes in liquid form containing the same hydrocarbon eating microbes. This is for use in cleaning and it can easily cope with the worst kind of stains you can throw at it. The product is diluted with water depending on the nature of the task you are asking it to undertake.

## WASHING AWAY GREASE:

The environmentally sound way to wash away oil, grease, fats and petroleum based products. Non toxic, inflammable, non hazardous and bio degradable.

## SEPARATING OIL FROM WATER:

Ross Bio Cubes will convert all the oil fat and grease out of water so that the residue can be disposed of normally. Environmentally sound and bio-degradable.

## ROAD ACCIDENTS

Getting rid of oil left on the road after an accident is an absolute priority. Ross Absorbent leaves a completely dry surface and avoids the chance of the spill causing a further accident. Nor must it be left as a hazardous waste. The compact nature of the product makes it easy to carry, not take up vital space and its speed and effectiveness make it second to none. Ross Eliminator has big cost and convenience advantages over clay, recycled pulp and polypropylene. Once you've tried it you'll never go without it again.

POLICE • FIRE BRIGADES • AMBULANCE SERVICES • LOCAL TRANSPORT AUTHORITIES

## SO EASY TO USE:

- 1 Throw Ross Eliminator Absorbent on the oil spill

- 2 Brush it away and in seconds no oil will be left to cause further accidents.

- 3 Spill stations are available for use on petrol station forecourts and for use in warehouses and servicing bays. Comes with broom and shovel. No protective clothing needed.

# RESTAURANTS

When oil gets spilled in a busy kitchen it can be a disaster. It has to be cleaned up and cleaned up very quickly indeed especially if it's on the floor. This is where Ross Eliminator Absorbent comes into its own. Simply throw on some powder and within seconds it's a dustpan and brush job with not a trace of oil left behind. The degreaser is perfect for cleaning ovens and work surfaces. No modern kitchen is complete without these two products close to hand. Ross Eliminator leaves a completely dry surface.

# MARINE ACCIDENTS

Moving oil and petroleum based products around the country and indeed around the world is an accident waiting to happen no matter how careful everyone is and when accidents do happen they have to be dealt with quickly and it leaves a completely dry surface. Slippery surfaces can be deadly especially at sea. Nothing is faster or more effective in coping with this kind of emergency than Ross Eliminator. Indeed tankers are required by OPA 90 to carry oil spill kits and nothing fits the bill better than these products from Ross Environmental.

# PETROL STATION FORECOURTS

Accidents happen in even the most meticulously run business. When they do, you not only have to act fast, but also ensure that you're not left with a hazardous waste that's equally dangerous. The great beauty of Ross Eliminator is that when the microbes have done their work the waste becomes completely non hazardous. What's more the speed with which it works gets everything back to normal quickly with no wasted time.

# DIFFERENT APPLICATIONS IN USE IN THE UK

- ROAD ACCIDENTS
- AUTO SERVICING
- PAINT SPILLS
- MILITARY SERVICES
- SUPERMARKET SPILLAGES
- CONTAMINATED LAND
- MARINE DISASTERS
- OIL REFINERIES
- WAREHOUSES
- AUTO SHOWROOMS

MOBILE RECYCLING SPILL STATION

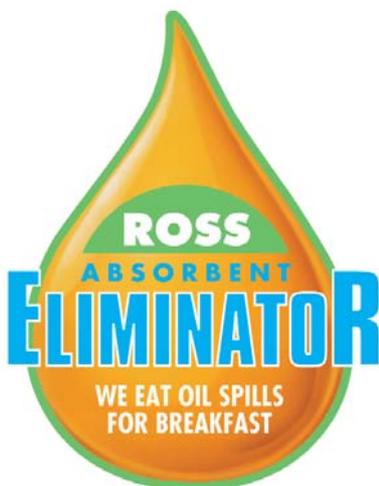

WALL MOUNTED RECYCLING SPILL STATION

SHOVEL AND BRUSH WITH EVERY SPILL STATION

ABSORBENT PAIL 2.2 KILOS

DEGREASER DRUM 25 LITRE

SACKS ABSORBENT 13.6 KILOS

Ross Environmental Products Ltd. is a company that is rightly considered by many to be the leader in the relatively new science of bio-remediation. It is a responsibility that is taken very seriously. The organisations that are now using oil eating bugs to solve the problems caused by accidents involving oil and related products range from restaurants to oil refineries. Proof positive that Ross Eliminator is not only easy to use and very cost effective but can also save hours of dirty, time consuming and frequently dangerous work.
